

MOLS Group-

Booth No. 937

Over 30 Years of Experience in Screw Manufacturing

MOLS Group has over 30 years of experience in screw manufacturing and operates a supply chain system with screw manufacturing, heat-treating and painting. MOLS group expanded the business scope step by step. The screw manufacturing factory was set up in 1991, heat treat factory in 2004 and painting factory in 2018. With over 30 years of experience to focus on the supply in the US market, MOLS is familiar with what customers' needs. MOLS dedicates to quality improvement and treats customers' comments as treasure. We listen to customers and respond to their needs at our best.

Introduction of Modern Painting Equipment

MOLS Group has worked out an achievement in the head painted screws in recent years, especially on Roofing Screws and RV Screws, and we also paint any screws that are required to head painting. In order to offer our customers steady lead time and good quality on painted screws, MOLS invested millions of US dollars in establishing the painting factory as well as modern painting equipment. The customized modern automatic painting equipment has sufficiently increased the painting capacity and also avoids hand racking screws causing the unstable lead times. To ensure our customers having the good quality products, MOLS made a lot of effort to improve the screw performance in regard to drilling time and paint adhesion. The paint adhesion on screw heads and EPDM bonded washers is critical, so MOLS not only conducts the performance test with the testing machine but also imitates the real-world test that how customers use the screws in their applications.

The painting colors are customized to meet customers' needs, and we offer more than hundreds of colors to match customers' applications.

Various Options to Maximize Customers' Benefits

Like our company name reads, the 4 letters of MOLS stand for More Efficiency, Outstanding Quality, Less Cost and Speedy Service, which are our business philosophy that we want to do for all of our customers. MOLS is specialized in manufacturing various fasteners, such as Roofing Screw, Self-Tapping Screw, RV Screw, Gutter Zip Screw, HAVC Screw, Self-Drilling Screw, Home Appliance Screw and Triangular Thread Screw that are used in various industries and received good feedback from the customers. MOLS is dedicated to providing our best to all of our customers and use our valuable resources to create maximum benefits for our customers.
